eBooks

This guide will show you how to find electronic books (eBooks).

1. Locate the IIT/I-Share catalog.

You can find a link on the right side of the library’s homepage, under “Quick Links.”

2. Search for books.

You can search for a specific book title, an author, or a topic in the search bar. Then click Find.

3. Filter the results.

On the right side of the results page, find the Format box. Select “Electronic” to select only the eBooks.

4. Read books.

Find the book you’d like within the results and click on the “Access to the electronic version…” link.

Some books can be downloaded in entirety, some books allow a limited amount to be downloaded, and some books will only allow you to read them online. Also note that eBooks found in the I-Share catalog are usually only readable by members of the holding institution.

Questions? Email the Research Help Office at rho@iit.edu or call 312-567-3616.
